PROBLEM: Left over Class "A" Bear License not being purchased by successful applicants by established dead lines.

SOLUTION: Maintain the August 1<sup>st</sup> dead line for successful applicants to purchase their class "A" license.

Remaining license could be sold after August 1<sup>st</sup>.

Example: Saturday nearest August 15<sup>th</sup> 12:00 noon

Make left over license available to hunter that have previously applied for permits and have established preference points. Remaining license to be sold one only per hunter per year, first come first served basis, through over the counter sales. Successful license purchaser, preference points would roll back to "0".

Whereas offering to sell unpurchased permits would offer hunting opportunities to more people, while ensuring all permits are fully utilized.

Whereas unsold license do not create revenue.
